

AHMED SULAIMON

07436195968 | London, UK | Sulaimonahmed08@gmail.com | LinkedIn: <https://shorturl.at/7Cuew>

Graduate Software Engineer with hands-on experience designing and deploying full-stack applications. Skilled in Python, C#, JavaScript/TypeScript, and SQL/NoSQL databases, with proven ability to build scalable microservices, automate workflows, and collaborate in agile teams. Passionate about data-driven engineering, modern development practices, and applying AI/ML to real-world systems.

Technical Skills

Languages/Frameworks: Python, C#, TypeScript, JavaScript (ES6+), React, Next.js, FastAPI

Databases/Cloud: SQL, PostgreSQL (JSONB), MongoDB, AWS (Cloud Practitioner), Docker, Git

Testing/Quality & Tools: pytest, Selenium, unit/integration testing, CI/CD pipelines (GitHub Actions), IaC basics

Practices: Agile development, software architecture, data pipelines, microservices, API design

Experience

Scrapays - Recycling Tech Startup

Jun 2024 – Aug 2024

Software Engineering Intern

- Refactored Axios API client in a React/Next.js frontend, reducing API latency by ~20% and boosting Lighthouse score 58 → 75.
- Built and deployed internal tools with Docker and CI/CD pipelines (GitHub Actions), improving developer workflows.
- Worked closely with design and product teams to strengthen agile delivery and align features with business needs.

Sheffield Hallam University

Jan 2025 – May 2025

Junior Software Instructor & Student Mentor

- Mentored 40+ students on REST APIs, testing and Git workflows; improved lab pass rates 60% → 85% and reduced recurring bugs by 25%.
- Delivered 1:1 coaching on Git workflows, debugging and API integration to improve code maintainability.
- Designed agile-focused lab exercises covering data handling and test-driven development.

Personal Projects

Automated PR Review Assistant (AI Tool)

2025

- Designed and deployed a multi-tenant, microservice system (FastAPI, Redis, Docker) to automate GitHub PR reviews.
- Implemented diff analysis pipeline combining GitHub GraphQL/REST APIs, OpenAI-based code feedback, and inline PR comments.
- Developed and published a CLI Dashboard (PyPI) for listing PRs, viewing AI feedback, and re-triggering reviews.
- Integrated Pytest test suite + GitHub Actions CI/CD (unit/integration tests, OIDC-secured PyPI publishing).

Automated Grocery Price Comparison App

2025

- Built a consumer-facing price comparison tool with a Flutter frontend, FastAPI microservices backend, PostgreSQL (JSONB), and Docker.
- Integrated ML models (Weighted Moving Average) to forecast prices & generate recommendations.
- Conducted usability testing with 15 participants: 80% rated usability 4/5+, leading to design improvements.

Education

BEng Software Engineering (1st Class Honours)

Sep 2022 – May 2025

Sheffield Hallam University

Sheffield, UK

Relevant Coursework: Databases, Software Architecture & Design, Machine Learning, Web Technologies
