

AHMED SULAIMON

07436195968 | London, UK | Sulaimonahmed08@gmail.com | LinkedIn: <https://shorturl.at/7Cuew>

Graduate Software Engineer who builds reliable microservices and automation (Python/JS). Experienced with Docker, GitHub Actions, pytest and user-validated ML prototypes, ready for backend/platform engineering roles.

Technical Skills

Languages/Databases: Python, C#, SQL, JavaScript, MongoDB, PostgreSQL (JSONB), AWS (Cloud Practitioner)

Frameworks & Tools: Fast API, Node.js, React, Next.js, Flutter, Tailwind CSS, Docker, Git, CI/CD pipelines, pytest

Experience

Sheffield Hallam University

Jan 2025 – May 2025

Junior Software Instructor & Student Mentor

- Mentored 40+ students in **Flutter** mobile-app labs, improving average pass rates from 60% → 85% and reducing recurring bugs by 25%.
- Delivered 1:1 coaching on Git workflows, debugging, and **REST API integration**, enhancing code maintainability and student confidence.
- Redesigned lab guidance to align with agile practices, clarifying outcomes and increasing engagement with technical demos.

Scrapays - Recycling Tech Startup

Jun 2024 – Aug 2024

Software Engineering Intern

- Refactored Axios API client in a **React/Next.js** frontend, reducing API latency by ~20% and boosting Lighthouse score 58 → 75.
- Added CI checks and collaborated with DevOps to stabilise releases, reducing pre-release defects.
- Coordinated triage with UX and QA to speed up time-to-production for high-priority fixes.

Personal Projects

Automated PR Review Assistant

2025

- Built distributed PR-review microservices (**Python, FastAPI, Redis, Docker**) to automate GitHub inline reviews.
- Implemented diff analysis using **OpenAI API** + custom heuristics; posted inline comments to GitHub to speed reviews.
- Added **pytest** unit & integration tests with Redis/GitHub APIs mocks and CI via **GitHub Actions**.
- Created a CLI Dashboard with commands to list past reviews, inspect detailed AI comments, and re-trigger rechecks. Technical Blog: <https://shorturl.at/jDRkI> | GitHub Repo: <https://shorturl.at/JrWrh>

Automated Grocery Price Comparison App

2025

- Architected **FastAPI** microservices processing 10k+ daily simulated records, storing analytics in **PostgreSQL (JSONB)**, and containerised with **Docker**.
- Implemented machine learning (**Weighted Moving Average**) to forecast grocery price trends.
- Conducted prototype usability testing with 15 participants; 80% rated the app's usability positively (4/5+), and feedback led to UI and filtering improvements.
- Developed a **Flutter** frontend to visualise price insights and implemented automated end-to-end tests with **Selenium**. Technical Blog: <https://shorturl.at/kx4t6> | GitHub Repo: <https://shorturl.at/oF6tW>

Education

BEng Software Engineering (1st Class Honours)

Sep 2022 – May 2025

Sheffield Hallam University

Sheffield, UK

Relevant Coursework: Databases, Machine Learning, Software Architecture & Design, Web Technologies.
