

AHMED SULAIMON

07436195968 | London, UK | Sulaimonahmed08@gmail.com | LinkedIn: <https://shorturl.at/7Cuew>

Full-stack engineer specialising in React/Next.js frontends, Node.js APIs, and FastAPI microservices. Skilled in PostgreSQL (JSONB), Docker, and CI/CD, with a track record of improving API performance and building scalable data services.

Education

BEng Software Engineering (1st Class Honours)

Sep 2022 – May 2025

Sheffield Hallam University

Sheffield, UK

Relevant Coursework: Databases, Machine Learning, Software Architecture & Design, Web Technologies.

Experience

Sheffield Hallam University

Jan 2025 – May 2025

Junior Software Instructor & Student Mentor

- Mentored 40+ students in mobile-app labs (Flutter). Introduced ESLint rules and a PR checklist; increased average assignment pass rate from 60% → 85% and reduced recurring bugs by 25% within one semester.
- Delivered 1:1 coaching on Git workflows and REST API integration, improving debugging speed and code maintainability.
- Redesigned lab guidance with lead lecturer to align with industry practices, clarifying outcomes and increasing engagement.

Bright Network – IEUK 2024 (in partnership with Lloyds Bank, BT Group)

Jul 2024

Technology On Demand Intern

- Implemented features in two-week sprints using Jira and GitHub; configured GitHub Actions to automate tests and deployments, improving release reliability.
- Built infrastructure-ready components and contributed to design reviews focused on testability and scaling.
- Presented sprint demos to cross-functional stakeholders, incorporating feedback into subsequent iterations

Scrapays - Recycling Tech Startup

Jun 2023 – Aug 2023

Software Engineering Intern

- Implemented React/Next.js UI and refactored Axios API client, reducing API response time from 250ms → 200ms (~20%) and improving Lighthouse performance from 58 → 75.
- Enhanced UI responsiveness with Tailwind CSS; worked with DevOps to add CI checks for UI builds.
- Coordinated triage and release activities across UX, QA, and DevOps, reducing pre-release issues.

Personal Project

Automated Grocery Price Comparison App

2025

- Architected FastAPI microservices processing a simulated grocery price dataset of 10k+ daily records; stored analytics in PostgreSQL (JSONB) and containerised with Docker.
- Conducted prototype usability testing with 15 participants; 80% rated the app's usability positively (4/5+), and feedback led to UI and filtering improvements.
- Developed a Flutter frontend to visualise price insights and implemented automated end-to-end tests with Selenium.
- Published technical write-ups documenting architecture and lessons learned.
